SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Patients and Methods The study was carried out in accordance with the principles of the Declaration of Helsinki, and approval from the Ethical Committee of Zagazig Faculty of Medicine and an Institutional Review Board (IRB) code was obtained (IRB No: ZU-IRB 536210-4-2019).
Consent: Informed consent was obtained from the parents of all patients.
Inclusion and Exclusion Criteria
Inclusion Criteria Patients younger than 3 years diagnosed as having PCG were included.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
This clinical trial included 63 eyes of 36 patients with primary congenital glaucoma (PCG), eyes were randomized by random allocation computer program into 3 equal groups (21 eyes in each group) eyes in group I were treated with combined trabeculotomy-trabeculectomy (CTT), group II were treated with CTT augmented with mitomycin-C, while eyes in group III were treated with CTT augmented with collagen implant (Ologen).
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis All statistical analyses were performed using Statistical Package for the Social Sciences (SPSS, version 25.0).	Statistical Package for the Social Sciences		Suggestion: SPSS, RRID:SCR_002865(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
