Document Identifier: **PMC8748860**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved by the Institutional Review Board (No. 1910-065-1070) at the performing institution.
Inclusion and Exclusion Criteria
not detected.
Attrition
Twelve patients were examined, and their medical records were retrospectively analyzed.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
IBM SPSS Statistics 25 software was used to complete the statistical analysis.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
The common variants were filtered using gnomAD (http://gnomad.broadinstitute.org) and KRG (http://coda.nih.go.kr/coda/KRGDB) databases.	http://gnomad.broadinstitute.org		
The Human Gene Mutation Database and ClinVar were used to search for known pathogenic variants.	Human Gene Mutation		Suggestion: Human Gene Mutation Database (RRID:SCR_001621)(link)
	ClinVar		Suggestion: ClinVar (RRID:SCR_006169)(link)
The sequence variants were evaluated by computational (in silico) predictive programs using PolyPhen-2, SIFT, and MutationTaster.	PolyPhen-2		
	SIFT		Suggestion: SIFT (RRID:SCR_012813)(link)
	MutationTaster		Suggestion: MutationTaster (RRID:SCR_010777)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Fisher's exact test was performed to compare the clinical features between patients with and without ACTG2 variants.	Fisher's exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
