SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Patients who had received androgen-deprivation therapy (ADT) or had undergone choline PETCT <=3 months before screening were excluded as were any patients who had received another investigational product from 1 month before to 1 week after 18F-fluciclovine PETCT, any patients with known 18F-fluciclovine hypersensitivity or any with bilateral hip prostheses.
Attrition
not required.
Sex as a biological variable
Methods Full methods for the FALCON trial have been reported elsewhere 10, but in summary, men with a first biochemical recurrence episode following curative-intent therapy who were being considered for salvage therapy underwent 18F-fluciclovine PETCT at one of six UK sites as part of the open-label multicentre trial.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Effect of prior prostatectomy For the present analysis we stratified patients enrolled in FALCON according to whether or not they had undergone radical prostatectomy and evaluated the 18F-fluciclovine findings by anatomic site in these two groups.	FALCON		Suggestion: Falcon (RRID:SCR_023199)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Fisher Exact Test was used to test significance between patient-level imaging findings.	Fisher Exact Test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
