SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: After explaining the researchs aims, methodology and expected results, the students were invited to participate voluntarily in the study and they gave their consent, filling out the form themselves.
Inclusion and Exclusion Criteria
The exclusion criterion was not answering more than one item of the questionnaire.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
16 Data analysis The data collected was analysed using IBM SPSS Statistics for Windows, V.27.0 (IBM Corp).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Fisher test was used when an expected value was less than 5.	Fisher test
Taking into account the possible effect of sex on the relation between academic year and the score of the short version of the Spanish HLS-EU-Q, stratification by sex was accomplished during the analysis, the OR was calculated with their respective 95 CI, and the OR was corrected with the Mantel-Haenszel test (ORM-H).	Mantel-Haenszel test
The Hosmer-Lemeshow test was used to assess the goodness of fit for the model.	Hosmer-Lemeshow test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
