SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Of all 1096 biopsy reports of PSC and PBC found in the pathology database, we excluded all indication biopsies that were taken due to abnormal liver biochemistry, biopsies at the time of transplantation, and follow-up biopsies, which were scheduled for a later date due to either clinical or histopathological findings, at autopsy or before LTx.
Attrition
Fifty-three patients had multiple protocol biopsies (Fig. 1).
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Data Information

Availability: Structured histopathological reports on posttransplantation biopsies interpreted by a liver pathologist have been available in the electronic database of the Department of Pathology since 2004.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
2.4 Statistics Statistics was done using IBM SPSS version 25 (New York, NY), and group comparisons were done using either Fisher exact test or chi-squared test.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
2.4 Statistics Statistics was done using IBM SPSS version 25 (New York, NY), and group comparisons were done using either Fisher exact test or chi-squared test.	Fisher exact test
	chi-squared test
The t test was used to compare means, and the nonparametric independent-samples median test was used when data were not normally distributed.	t test
	median test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
