SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: A paper leaflet describing the purpose and nature of the study, consent form, and questionnaire were sent to the parents.
Inclusion and Exclusion Criteria
The inclusion criteria were as follows: boys and girls aged 8–12 years; Saudi ethnic origin, and an eruption of at least one FPM.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: 2 Materials and methods This was a cross-sectional survey conducted between March and April 2019, targeting 8–12-year-old Saudi schoolchildren in the third, fourth, fifth, and sixth grades attending public and private elementary schools in Riyadh.
Randomization
not detected.
Blinding
not detected.
Power Analysis
The sample size was calculated using Java Applets by Lenth (2006–9).
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data were analysed using IBM SPSS version 21 (IBM , Armonk , NY , USA)	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Associations between age and sex and the distribution and severity of MIH/HSPM were tested using chi-squared and Fisher's exact tests.	chi-squared
	Fisher's exact tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
