SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by the ethics committee of each participating site.
Consent: All patients provided written informed consent before study procedures in accordance with country-specific applicable data privacy acts, the Declaration of Helsinki, and the applicable laws for research using medical devices.
Inclusion and Exclusion Criteria
Detailed inclusion and exclusion criteria are available in Table 1 and Table S1.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Participants The study population includes patients 18 to 80 years of age undergoing first-time catheter ablation of paroxysmal or persistent AF that failed at least one antiarrhythmic drug (class I or III), which is in accordance with the current European and US guidelines for the management of AF. 3,7,8 At least one episode of AF had to be documented by ECG within 1 year before enrollment in the trial for patients with paroxysmal AF.
Randomization
not detected.
Blinding
not detected.
Power Analysis
SAEs Included in the Primary Safety End Point Statistical Analysis The sample size of the first-in-human pilot study was not determined by a formal sample size calculation.
Replication

not required.

Data Information

Availability: Methods The authors declare that all supporting data are available within the article (and its Supplemental Material).

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were performed using the SAS software, version 9.4 (SAS Institute, Cary, NC).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
