SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Field Sample Permit: The number of children with special needs is reported in each AEDC collection .
Inclusion and Exclusion Criteria
Cut-off scores are based on all children who participated in the first national AEDC data collection in 2009 , excluding children with special needs , and apply to all AEDC data collections .
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: Study population The study population comprised 5,440 children who had a Tasmanian 2015 AEDC instrument collected in the first year of full time school at age five years (i.e., Preparatory Year) and a Tasmanian Perinatal Baby Record collected in all Tasmanian public and private hospitals for all live births and stillbirths of at least 20 weeks gestation or weighing at least 400 grams.
Weight: Birth risks The risk variables obtained from the Perinatal Baby Records were: low birth weight (less than 2500 grams) , low gestational age (less than 37 completed weeks) and multiple birth .
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Parental educational attainment is monitored in Australias National Assessment Program 43 , socioeconomic disadvantage is monitored in Australias Health reporting framework 44 , and low birth weight , teenage mothers , Indigenous mothers , parity , smoking in pregnancy , alcohol use in pregnancy and language background other than English , are monitored in Australias Mothers and Babies reporting framework 45 .	Australias National Assessment Program		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
