Document Identifier: **PMC8783201**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
Add a secondary antibody (Alexa Fluor 488 donkey anti-mouse IgG) at 1:1000 dilution in PBS , incubate at room temperature for 1 h , on a platform shaker (20 rpm) . 21 .	anti-mouse IgG		
Incubate the coverslips with primary antibodies against GluA2-NTD (Millipore , CatMAB397 , mouse) and Synapsin 1 (Cell Signaling , Cat5297 , rabbit) , both at 1:1000 dilution in PBS for 12-16 h at 4degC , on a platform shaker (20 rpm) . 28 .	GluA2-NTD		
	Synapsin 1		
After Step 26 , incubate the coverslips with primary antibodies against microtubule-associated protein 2 (MAP2) (Millipore , CatMAB3418 , rabbit) at 1:1000 dilution , for 1 h at room temperature , on a platform shaker (20 rpm) .	antibodies against microtubule-associated protein 2		
	MAP2		
Add secondary antibody (Alexa Fluor 488 goat anti-rabbit IgG) at 1:1000 dilution and rhodamine phalloidin (Thermo Fisher , CatR415) at 1:1500 dilution , incubate at room temperature for 1 h , on a platform shaker (20 rpm) . 35 .	anti-rabbit IgG		
Software and Algorithms			
In pClamp software , switch from Bath to Patch , and apply -65 mV voltage to facilitate the formation of Giga-ohm seal (Methods video S2: Clampex interface view showing whole-cell patch process) .	pClamp		Suggestion: pClamp Software, RRID:SCR_011323(link)
Analyze mEPSCs using MiniAnalysis Program (Synaptosoft) .	MiniAnalysis Program		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
