SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: ALI, advanced lung cancer inflammation index; BMI, body mass index; HR, hazard ratio; NLR, neutrophil-to-lymphocyte ratio The protocol of this study was approved by the Human Ethics Review Committee of the Graduate School of Medicine, Kumamoto University (Institutional Review Board number 1047), and carried out according to the Declaration of Helsinki and Good Clinical Practice Guidelines.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
The cutoff value was calculated separately for male and female patients based on past reports.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
10 (SAS Institute, Cary, NC), or R V. 3.6.3 (R Development Core Team, Vienna, Austria).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)
	R Development Core		Suggestion: R Project for Statistical Computing, RRID:SCR_001905(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
We analyzed categorical variables using the chi-square test and continuous variables using Student's t-test.	chi-square test
	t-test
The Kaplan–Meier method and log-rank test were used for the survival analysis.	log-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
