SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol complied with the Declaration of Helsinki and was approved by the Committee on Ethics of Kasugai Municipal Hospital.
Inclusion and Exclusion Criteria
Patients undergoing haemodialysis, those who were hospitalized multiple times for HF during the study period, and those who with HF caused by acute myocardial infarction were excluded.
Attrition
Methods In this retrospective study, 314 patients who were hospitalized for acute decompensated HF at Kasugai Municipal Hospital from August 2019 to October 2020 were enrolled.
Sex as a biological variable
9 Anaemia was defined as haemoglobin levels < 13 gdL for males and <12 gdL for females according to the World Health Organization committee.
Subject Demographics
Weight: Among the phenotypic components, non-volitional weight loss > 5 within the past 6 months and body mass index < 18.5 kgm2 for age < 70 years and <20 kgm2 for age >= 70 years were used as cut-offs.
Age: Among the phenotypic components, non-volitional weight loss > 5 within the past 6 months and body mass index < 18.5 kgm2 for age < 70 years and <20 kgm2 for age >= 70 years were used as cut-offs.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Definitions Heart failure was defined according to the American College of CardiologyAmerican Heart Association guidelines, as the presence of HF signs and symptoms and confirmed left ventricular systolic or diastolic dysfunction.	CardiologyAmerican Heart Association		
Statistical analysis SAS software (Version 27 SAS Institute, Inc. Cary, NC, USA) was used for statistical analyses.	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
