SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethics, funding, data sharing, and potential conflicts of interest Approval by the Regional Ethics Committee was not required (case number 1-10-72-181-20), as it was based on data from quality-control studies.
Inclusion and Exclusion Criteria
not detected.
Attrition
Patients of P2 (n = 71) were operated on between July and November 2020 and interviewed in February 2021.
Sex as a biological variable
) p-value a Age b 65 (10) 68 (7) 63 (11) 64 (10) 0.005 Male 125 (59) 32 (50) 45 (63) 48 (63) 0.2 Distance , km b 66 (37) 72 (38) 70 (39) 59 (32) 0.06 Days since operation b 122 (46) 99 (28) 161 (41) 105 (38) < 0.001 Satisfaction 0.5 Very dissatisfied 3 (1) 0 (0) 2 (3) 1 (1) Dissatisfied 8 (4) 2 (3) 1 (1) 5 (7) Ambivalent 13 (6) 2 (3) 6 (8) 5 (7) Satisfied 25 (12) 7 (1) 7 (10) 11 (14) Very satisfied 162 (77) 53 (83) 55 (77) 54 (71
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Data Information

Availability: Data can be made available on request to the corresponding author.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistics We first presented descriptive statistics for all single variables across the 3 pathways and compared the variables across path- ways using bivariate tests (ANOVA or chi-square) (Table 1).	ANOVA
	chi-square
For categorical variables , we use the chi-square test , which tests the null hypothesis that the 2 categorical variables are independent of each other . p-values below 0.05 reject the null hypothesis .	chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
