Document Identifier: **PMC8789583**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Field Sample Permit: 2.2 Plant material collection Wild plants of Buddleja scordioides Kunth were collected in 2017 in Guadalupe Victoria , Durango , Mexico (24deg1859N , 104deg53W) .
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
The results were managed in the resource provided by Cayman Chemical(r) (Elisa Double Worksheet , www. caymanchem . comanalysiseia) and expressed as inhibition percentage ( ) . 2.12 Statistical analysis The experimental design of the UAE was a completely randomized unbalanced factorial with three factors of two and three levels , having in total 18 treatments with three repetitions (Table 1) .
Blinding
not detected.
Power Analysis
not detected.
Replication
The results were managed in the resource provided by Cayman Chemical(r) (Elisa Double Worksheet , www. caymanchem . comanalysiseia) and expressed as inhibition percentage ( ) . 2.12 Statistical analysis The

experimental design of the UAE was a completely randomized unbalanced factorial with three factors of two and three levels , having in total 18 treatments with three repetitions (Table 1) .
Number: The results were managed in the resource provided by Cayman Chemical(r) (Elisa Double Worksheet , www. caymanchem . comanalysiseia) and expressed as inhibition percentage ( ) . 2.12 Statistical analysis The experimental design of the UAE was a completely randomized unbalanced factorial with three factors of two and three levels , having in total 18 treatments with three repetitions (Table 1) .

Data Information

Identifiers: , sodium hydroxide (NaOH) , aluminum chloride (AlCl3) , sodium nitrite (NaNO2) , potassium persulfate (K2S2O8)	K2S2O8

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
UPLC-PDA-ESI-MSMS management and data processing were performed using MassLynx v .	MassLynx		Suggestion: MassLynx (RRID:SCR_014271)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The data analysis was performed with factorial ANOVA , p = 0.05 and mean analysis by Fisher test (p = 0.05) .	ANOVA
	Fisher test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
