SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
One mother was reported to be super happy that COVID-19 happened: she said the entire family was at home I am so happy , we eat together , I can spend time with them (I-28) .

Your Sentences	Recognized Entity
Statistical Tests	
Data analysis To further triangulate both the quantitative and qualitative data , independent sample t-tests were used to analyse the group differences in mothers job loss , permanency of mothers job , loss of income earner on mothers depression and anxiety .	t-tests
Paired samples t-test were used to analyse differences in mothers PSOC , childs total behaviour problems , mothers depression and mothers anxiety across wave 2 and wave 3 .	t-test
Factorial analyses of variance were used to analyse interaction effects of mothers job loss x marital status , mothers job loss x number of children , loss of income earner x marital status , and loss of income earner x number of children on mothers depression and anxiety .	Factorial analyses of variance

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
