Document Identifier: **PMC8797442**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by Ethics Committee of Cancer Hospital, Chinese Academy of Medical Sciences (Beijing, China) (No. NCC2015B-01) and informed consent was taken from all the patients.
Consent: The study was approved by Ethics Committee of Cancer Hospital, Chinese Academy of Medical Sciences (Beijing, China) (No. NCC2015B-01) and informed consent was taken from all the patients.
Inclusion and Exclusion Criteria
not detected.
Attrition
There were 30 males and 2 females, and 16 patients who achieved complete remission (CR) during follow-up, and 16 patients with partial remission.
Sex as a biological variable
There were 164 males, aged 15-84 years, with a median age of 49 years and 165 females, aged 9-77 years, with a median age of 54 years in this retrospective study.
Subject Demographics
Age: There were 164 males, aged 15-84 years, with a median age of 49 years and 165 females, aged 9-77 years, with a median age of 54 years in this retrospective study.
Randomization
Moreover, serum samples from 20 patients were randomly selected and detected twice by MALDI-TOF-MS.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
25 mg of Sinapic Acid (SA) matrix powder (Sigma) was weighed into the above mixture.	Sigma		Suggestion: sigma-tau (RRID:SCR_000488)(link)
Statistical analysis Statistical analysis was conducted using SPSS 22.0 statistical software.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The data with normal distribution were expressed by mean +- standard deviation, and the data of each group were compared by t-test.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
