SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics	
IRB: The study was approved by the institutional ethics board of China-Japan Friendship Hospital (No. 2018-13-K08) and Consent of patients was waived because it was a retrospective study.	
Inclusion and Exclusion Criteria	
not detected.	
Attrition	
not detected.	
Sex as a biological variable	
not detected.	
Subject Demographics	
Age: not detected.	
Weight: not detected.	
Randomization	
not detected.	
Blinding	
not detected.	
Power Analysis	
not detected.	
Replication	
not required.	
Data Information	
Identifiers: We included patients with the following criteria: (I) received lobectomy	T1N0M0

and sublobectomy without any preoperative chemoradiotherapy (II) was preoperatively staged as clinical stage IA (T1N0M0, tumor size <=3 cm) (III) was pathologically confirmed with peripherally located primary lung adenocarcinoma (outer one-third of the hemithorax) or (IV) underwent systematic LNs dissection or sampling based on the European Society of Thoracic Surgeons criteria (9).	

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was performed with SPSS 24.0 software (SPSS, Inc., Chicago, IL, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analysis Categoric variables were expressed as percentages and evaluated with l2 or Fishers exact test.	Fishers exact test
Continuous data were presented as mean +- SD and were compared using the ANOVA, two-sample Student t test and nonparametric tests.	ANOVA
	t test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
