SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by the ethics committee of The First Affiliated Hospital with Nanjing Medical University (2018-SR-368) and was conducted in accordance with the Helsinki Declaration of 1964 (revised 2008).
Consent: Due to the retrospective nature of this study, the need for informed consent was waived.
Inclusion and Exclusion Criteria
The eligible patients were female, >=20 years old with stage I to III invasive breast cancer, who received chemotherapy determined according to established clinical risk factors and breast cancer guidelines.
Attrition
not detected.
Sex as a biological variable
The eligible patients were female, >=20 years old with stage I to III invasive breast cancer, who received chemotherapy determined according to established clinical risk factors and breast cancer guidelines.
Subject Demographics
Age: The eligible patients were female, >=20 years old with stage I to III invasive breast cancer, who received chemotherapy determined according to established clinical risk factors and breast cancer guidelines.
Randomization
not detected.
Blinding
WFO and the physicians who ran the cases were blinded to the chemotherapy regimens determined by oncologists.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All statistical analyses were performed using Stata version 11.0 (StataCorp, College Station, TX, USA), and a significant difference was concluded for P<0.05.	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
