Document Identifier: **PMC8798359**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: All 25 patients provided written, informed consent for anonymized use of their clinical data for study purposes.
IRB: The study and all procedures involved were conducted under approval granted by the institutional review board of Kanagawa Cancer Center (IRB number: 2019EKI43), and informed consent was obtained from all 25 patients.
Inclusion and Exclusion Criteria
not detected.
Attrition
Methods Tissue samples Tissues used in the study were obtained from 25 patients who, having been diagnosed with advanced colorectal cancer, underwent open or laparoscopic colectomy at Kanagawa Cancer Center between June 2019 and June 2020.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
Each tissue block was placed in the holder attached to the front of the device (Figure 1), the tissue was irradiated at 3–5 random spots, and the Raman spectra were recorded by the device.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Raman spectrometry We analyzed the tissue samples with use of the Progeny™ spectrometer, as previous reported (22).	Progeny™		Suggestion: PROGENY (RRID:SCR_006647)(link)
14 (SAS Institute Inc., Cary, NC, USA).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Differences were analyzed by Kruskal-Wallis test, with P<0.05 considered statistically significant.	Kruskal-Wallis test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
