SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Patients written consent were not needed because this study is a retrospective study, and both CT and MRI were performed as regular examinations in our institution.
Inclusion and Exclusion Criteria
not detected.
Attrition
Methods Patients and data acquisition Clinical records and functional images of 41 patients were retrieved in this study under the ethical board approval of Shuguang hospital affiliated to Shanghai Traditional Chinese Medical University from June 2018 to April 2019.
Sex as a biological variable
Table 1 Characteristics of patients--CT, MR Characteristics Early-stage CRC Late-stage CRC Age (year) 66.67+-6.80 70.83+-7.43 Male 5 (529) 1 (11) Female 1 (129) 7 (729) Tumor pathologic types Chorionic tubular adenoma with intraepithelial neoplasia 2 (229) T3: Adenocarcinoma 21 (2129) Mucinous adenocarcinoma 1 (
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
From each of the CT contrast-enhanced image, MR cT1-w image and T2-w image, 110 image parameters were computed using an open-source Python package PyRadiomics (12).	Python		Suggestion: python-bx (RRID:SCR_024202)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
