SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: An IRB approval and informed consent of the patients were not required for this network meta-analysis.
Inclusion and Exclusion Criteria
Selection criteria We analyzed the articles meeting the following inclusion criteria: Randomized controlled trials (RCTs) or qualified cohort studies Comparison of different preoperative treatments for LARC Twelve preoperative regimens were enrolled , namely , radiation therapy plus 5-fluorouracil (RT+5-Fu) RT plus capecitabine (RT+CAPE)
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Recombinant DNA			
Odds ratio (OR) and 95 credible interval (95 CrI) were calculated for pCR using GeMTC version-0.14.3.	pCR		
Software and Algorithms			
Search strategy Databases including, EMBASE, Cochrane Central Register of Controlled	EMBASE		Suggestion: EMBASE (RRID:SCR_001650)(link)
The RCTs bias was evaluated according to the Cochrane Handbook for Systematic Reviews of Interventions (2).	Cochrane Handbook		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The network structure diagrams, funnel plots and Beggs test were all completed with STATA14.	Beggs test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
