SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved by the Sadamoto Clinic Institutional Review Board (approval No. 1802) and conducted in accordance with the Declaration of Helsinki.
Consent: Written informed consent was obtained from all participants.
Inclusion and Exclusion Criteria
not detected.
Attrition
The participants in the sensory test were 10 healthy older volunteers (mean age +- standard deviation SD, 73.4 +- 3.3 years) who had no deformities of the hands and fingers and were taking drugs daily, and 11 patients with RA (mean age +- SD, 66.0 +- 7.8 years) who were not acute patients and had more than a 6-month history of drug therapy.
Sex as a biological variable
By chance, all participants were female, mainly because around 80 of patients with RA are female.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All statistical analyses were performed using GraphPad Prism 9 software (GraphPad Software Inc., San Diego, CA).	GraphPad Prism		
	GraphPad		Suggestion: GraphPad Prism, RRID:SCR_002798(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Differences were evaluated using t-tests.	t-tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
