SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Data collection Before completing the questionnaires, informed consent, stating the demands of the study, was obtained from those who agreed to participate.
Inclusion and Exclusion Criteria
Exclusion criteria included those who have co-morbidities, history of spinal surgeries or trauma/fractures, history of musculoskeletal pain other than LBP, history of primary insomnia, and history of mental illness or treated for a psychiatric disease.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Study population and sample size calculation The study involved 442 participants and the age range was between 20 and 60 years old.
Randomization
not detected.
Blinding
not detected.
Power Analysis
Study population and sample size calculation The study involved 442 participants and the age range was between 20 and 60 years old.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All data analyses were carried out using Statistical Packages for Software Sciences (SPSS) version 21 (IBM Corporation,	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Between comparisons, Chi-square tests, Mann–Whitney U test and Kruskal Wallis test were applied, whenever appropriate.	Chi-square tests
	Mann–Whitney U test
	Kruskal Wallis test
Normality, statistical interactions, and collinearity (i.e., variance inflation factor) were also assessed using the Kolmogorov–Smirnov and Shapiro–Wilk tests.	Kolmogorov–Smirnov
	Shapiro–Wilk tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
