SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved before study initiation by the Institutional Review Boards (IRBs) of Korea University Anam
Consent: IRBs waived the need to obtain informed consent because the study was retrospective and required no deviation from routine medical practice.
Inclusion and Exclusion Criteria
We included 136 patients who received KT from July 2012 to August 2016 at Seoul National University Hospital and 167 patients who received KT from April 2008 to October 2018 at Korea University Hospital.
Attrition
We included 136 patients who received KT from July 2012 to August 2016 at Seoul National University Hospital and 167 patients who received KT from April 2008 to October 2018 at Korea University Hospital.
Sex as a biological variable
not detected.
Subject Demographics
Age: Methods Study design and patients This was a retrospective cohort study including adolescent and adult patients aged 16 to 68 years who underwent living donor KT in two tertiary medical hospitals (Korea University Anam Hospital and Seoul National University Hospital in Seoul, Republic of Korea).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
