# SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

**Table 1: Rigor Adherence Table**

| |
|---|
| Ethics |
| not required. |
| Inclusion and Exclusion Criteria |
| We also excluded the data from hive E in the per-protocol analysis: we had begun the experiment the day before and had to stop the trial prematurely . |
| Attrition |
| not required. |
| Sex as a biological variable |
| not required. |
| Subject Demographics |
| Age: not required. |
| Weight: not required. |
| Randomization |
| One feeder was placed on the north tripod and the other was placed on the south tripod, and we randomly assigned the color cue background (yellow or blue, alternating between trials). |
| Blinding |
| not detected. |
| Power Analysis |
| not detected. |
| Replication |
| Number: The feeder was placed at each successive position until every forager demonstrated that they had learned the current position by visiting the feeder at least three times. |
| Data Information |

Availability: We will present here the results of the ( more philosophically correct ) Bayesian models , and the Maximum Likelihood Models are available upon request .

**Table 2: Key Resources Table**

| Your Sentences | REAGENT or RESOURCE | SOURCE | IDENTIFIER |
|---|---|---|---|
| Software and Algorithms | | | |
| We then converted video files filmed at 30 frames per second to AVI using Ubuntu ( v . 2004.2021.222.0 ) and imported them into ImageJ ( version 1.52i ) for visual analysis . | ImageJ | | Suggestion: ImageJ, RRID:SCR_003070( link) |

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
