SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved by the Ethics Committee of Tokyo Medical University, Tokyo, Japan (No: T2019-0234).
Consent: Informed consent was obtained from all respondents.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
We aimed to collect data from 3,000 men and women aged 20–79 years from all regions of Japan.
Subject Demographics
Age: We aimed to collect data from 3,000 men and women aged 20–79 years from all regions of Japan.
Randomization
The Internet research service company randomly chose potential respondents from its registrants (n = 13,191) and invited them to participate in the survey by e-mail on January 14, 2021.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were performed using IBM SPSS Statistics for Windows, version 27 (IBM Japan, Tokyo, Japan).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The McNemar test was performed to compare the proportion of participants with COVID-19 vaccination intent between the baseline and follow-up surveys.	McNemar test
14 These scores were compared between participants with COVID-19 vaccination intent and those who did not, using the t-test.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
