SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
We included studies only if they were original reports or observational studies with information on the rates of stroke cases and hospitalization before and during the COVID-19 pandemic.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Two authors (N.I. and A.J.B., both neurologists) independently screened the study titles and abstracts after removal of duplicates.
Number: Two authors (N.I. and A.J.B., both neurologists) independently screened the study titles and abstracts after removal of duplicates.

Data Information
Availability: Methods Data sources and study selection The data supporting the findings of study are available from the corresponding author upon reasonable request.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The PubMed and Embase databases were systematically searched from January 1st, 2020, until July 24th, 2021, for studies published in English.	PubMed		Suggestion: PubMed (RRID:SCR_004846)(link)
	Embase		Suggestion: EMBASE (RRID:SCR_001650)(link)
All analyses were performed with STATA version 17.0 (StataCorp.,	STATA		Suggestion: Stata (RRID:SCR_012763)(link)
	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Publication bias was assessed by inspecting funnels plots and performing the Egger test.	Egger test
Heterogeneity between studies and subgroups was assessed using the chi-square test on the Cochran Q statistic and quantified by the I2 index.	chi-square test
	I2 index

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
