SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The Congenital Corvitia registry was approved by the ethics boards of all participating centers and complies with the Declaration of Helsinki.
Consent: All participants of Congenital Corvitia provided written informed consent at the time of enrollment in the registry.
Inclusion and Exclusion Criteria
Patients who were given a diagnosis of Marfan syndrome, mentally impaired, or illiterate in Dutch were excluded from the study.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
Methods Subjects and Data Collection In this follow-up study, we performed secondary data analyses of the cohort of Schoormans et al, 10,11 comprising randomly selected adults with CHD enrolled in the nationwide Congenital Corvitia registry, who were approached by letter to participate in the study.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
For statistical analyses, SPSS version 25.0 (IBM Corp, Armonk, New York) and R studio version 1.1.456 (R Foundation, Vienna, Austria) were used.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Baseline variables between patients with and without type D and the distribution of causes of death were compared using independent t tests or kh2 tests.	t tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
