Document Identifier: **PMC8842457**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by the UCSF Human Research Protection Program Institutional Review Board (18-24261).
Consent: Participants provided written informed consent prior to study procedures (Supplementary Table S2).
Inclusion and Exclusion Criteria
Caregivers (i.e., a family member or friend) were eligible if paired with a participating patient.
Attrition
not detected.
Sex as a biological variable
All tracks were recorded in a female and a male voice and were engineered for uniform length per track.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
For the sample size calculation, an attrition rate of 23 was anticipated based on BP1.0 16 and feasibility was based on a retention rate of >=70 (i.e., >=70 of participants completing any follow-up assessment).
Replication
Number: Transcripts of the pre- and post-intervention interviews were coded using Atlas. ti software for qualitative data analysis by at least two investigators.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The study protocol was approved by the UCSF Human Research Protection Program Institutional Review Board (18-24261).	UCSF Human Research Protection Program		
Instruments Upon enrollment, participants were asked to complete questionnaires in REDCap 38 (link sent via email).	REDCap		Suggestion: REDCap (RRID:SCR_003445)(link)
The instruments included in the symptoms and wellbeing survey were: the National Comprehensive Cancer Network Distress thermometer (NCCN DT) 40,41 National Institutes of Health Patient Reported Outcomes Measurement Information System (NIH PROMIS) Anxiety 4a, Depression 6a, Global Health--Mental 2a, Self-Efficacy for Managing Emotions 4a (baseline only), and Sleep Disturbance 4a Five Facet Mindfulness Questionnaire Short Form (FFMQ-SF) and the Are You at Peace? one-item spiritual probe.	PROMIS		Suggestion: PROMIS 2 MY Health (RRID:SCR_021215)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Baseline characteristics of evaluable and non-evaluable participants were compared using t-tests for continuous and Fishers exact tests for categorical measures.	t-tests
	Fishers exact tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
