Document Identifier: **PMC8847496**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Compliance with Ethics Guidelines All study materials were reviewed and approved by an independent ethics committee prior to patient recruitment Advarra institutional review board (IRB), protocol number 0018-0873.
Consent: At the start of the telephone interview, patients were asked to verbally confirm their informed consent and permission for the interview to be recorded and transcribed.
Inclusion and Exclusion Criteria
Studies were eligible for inclusion if they were: qualitative studies or clinical trials or observational studies using PRO reporting on symptoms, HRQoL andor impacts or patient preference or adherence studies that included relevant experience, symptom or impact data.
Attrition
not detected.
Sex as a biological variable
For PHN patients, they had to have zoster-related pain 90 days after the initial rash and 90-365 days after the initial HZ diagnosis were aged 50 years or older, male or female had English-speaking and comprehension levels sufficient to understand the research study, complete the study documents and participate in a telephone interview in English Patients were excluded if they had received a shingles vaccine in the past or if they could not comply with the study protocol.
Subject Demographics
Age: For PHN patients, they had to have zoster-related pain 90 days after the initial rash and 90-365 days after the initial HZ diagnosis were aged 50 years or older, male or female had English-speaking and comprehension levels sufficient to understand the research study, complete the study documents and participate in a telephone interview in English Patients were excluded if they had received a shingles vaccine in the past or if they could not comply with the study protocol.
Randomization
not detected.
Blinding
not detected.

Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Searches were performed in September and October 2018 in the PROLABELS database via ePROVIDE, in MEDLINEEmbase and PsycINFO via the OVID platform, and ClinicalTrial.gov, limited to human studies published in English.	PsycINFO		Suggestion: PsycINFO (RRID:SCR_014799)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
