SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was reviewed and approved by the Fraser Health Research Ethics Board (Document dated 25 Aug 2017).
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: 20,26 To be included in this study, participants had to identify as a caregiver of a deceased patient who previously received Palliative Care at the Fraser Heath Authority (British Columbia, Canada), be ≥ 19 years of age, and able to read English.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Cell Line Authentication

Authentication: This survey was not validated and was designed by study authors to collect information on sociodemographics, life stressors, and physical and mental difficulties.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All team members read open-ended responses and categorized responses into themes using Excel to facilitate data extraction and analysis.	Excel		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Fisher's exact test was used to compare the observed frequencies of each of the PG-13 criteria between the 3 risk groups.	Fisher's exact test
A one-way analysis of variance (ANOVA) was used to compare the mean PG-13 scores between the 3 risk groups.	analysis of variance
	ANOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
