Document Identifier: **PMC8848579**

# SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

**Table 1: Rigor Adherence Table**

| |
|---|
| Ethics |
| IRB: The study was conducted in accordance with the Declaration of Helsinki and was approved by the Ethical Committee of University of Health Sciences, Ankara Child Health and Diseases Hematology Oncology Training and Research Hospital. (Protocol Code: 2015-017). |
| Consent: The parents of all children were informed about the study and their written informed consent was obtained. |
| Inclusion and Exclusion Criteria |
| However, children with hearing loss and mothers with any chronic diseases or psychological disorders were not included in the study, and those who were Denver not testable or were not compatible during the video recording were also excluded. |
| Attrition |
| not detected. |
| Sex as a biological variable |
| However, children with hearing loss and mothers with any chronic diseases or psychological disorders were not included in the study, and those who were Denver not testable or were not compatible during the video recording were also excluded. |
| Subject Demographics |
| Age: Methods Study Design and Population This descriptive study includes 1- to 5-year-old healthy children, applying consecutively to a pediatric clinic for a routine screening or check-up between January 2018 and June 2018. |
| Weight: Children who had a gestational age of >37 weeks, birth weight of >2500 g, and no genetic syndrome, neurological diseases, psychiatric disorders, or pervasive developmental disorders (such as autism spectrum disorder) were included in the study. |
| Randomization |
| not detected. |
| Blinding |
| not detected. |

| Power Analysis |
| --- |
| not detected. |
| Replication |
| not required. |

**Table 2: Key Resources Table**

| Your Sentences | REAGENT or RESOURCE | SOURCE | IDENTIFIER |
|---|---|---|---|
| Software and Algorithms | | | |
| Statistical Analysis Statistical analyses were performed using the IBM SPSS Statistics for Windows, Version 22.0 (IBM Corp., Armonk, NY, USA). | SPSS | | Suggestion: SPSS, RRID:SCR_002865( link) |

**Other Entities Detected**

| Your Sentences | Recognized Entity |
|---|---|
| Statistical Tests | |
| Shapiro-Wilk test was used to check whether the continuous variables in the study were normally distributed. | Shapiro-Wilk test |
| One-way analysis of variance (ANOVA) or Kruskal-Wallis test was applied for group comparisons where appropriate. | analysis of variance |
| | ANOVA |
| | Kruskal-Wallis test |

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
