SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Exclusion criteria included absence of photograph images, absence of significant data in the medical record, and mini, fleur-de-lis, circumferential and floating umbilicus abdominoplasties.
Attrition
We compared a group of 179 patients, who underwent biplanar lipoabdominoplasty (with SLAS preservation, elevation and tightening), with a group of 65 patients who underwent standard lipoabdominoplasty.
Sex as a biological variable
+- 9.01 42.8 +- 9.5 0.62 Gender 0.61 Men 3 (2) 2 (3) Women 176 (98) 63 (97
Subject Demographics
Age: Preoperative and postoperative images of a 50-year-old patient after biplanar lipoabdominoplasty .
Randomization
not detected.
Blinding
Aesthetic outcomes were evaluated blindly, on a five-point Likert scale, by an external observer, based on patients images.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
SPSS version 27 was used for all statistical analysis .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
For quantitative variables such as age and BMI , T test or Mann Whitney U tests were used to compare the groups .	T test
	Mann Whitney U tests
For categorical parameters such as marital status and complications , Fisher exact test or Pearson chi squared test were used to compare the groups .	Fisher exact test
	Pearson chi squared test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
