SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This retrospective study complies with the relevant provisions of the Declaration of Helsinki on protecting the rights of subjects and was approved by the Medical Ethics Committee of Sir-Run-Run-Shaw Hospital affiliated to Zhejiang University School of Medicine (ID:20211018-34).
Inclusion and Exclusion Criteria
Patients who had preoperative VTE and those with preoperative preventive anticoagulation or without complete data were excluded from the study.
Attrition
Finally, 541 patients were enrolled and the clinical data of these patients were collected to construct the risk assessment model (RAM) and risk score table.
Sex as a biological variable
not detected.
Subject Demographics
Age: Materials and Methods Patients From 1 June 2019 to 31 May 2020, 605 patients over 18 years underwent colorectal cancer surgery at Sir-Run-Run-Shaw Hospital affiliated to Zhejiang University School of Medicine.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis SPSS 19.0 software for Windows were used for statistical analysis.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Categorical variables are expressed as frequency and percentage, and compared by $\chi 2$ test or Fisher's exact test; Continuous variables are represented as mean ± standard deviation ($\bar{x} \pm s$) or median (interquartile spacing) M (P25,P75), and compared by student's t test or the Mann-Whitney U's test.	$\chi 2$ test
	Fisher's exact test
	t test
	Mann-Whitney U's test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
