SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
The studies from updated searches were split into batches and each record was independently reviewed by two authors (either RPWK and LT or LT and FP) based on title, abstract and full text using prespecified inclusion and exclusion criteria (available in the online supplemental file S3) to identify those eligible for inclusion in the update.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
Conflicts were resolved through discussion, with adjudication by a third reviewer (either FP or RB-G depending on who had not previously reviewed the record) where necessary. 10.1136bmjopen-2021-052832.supp3 Supplementary data Data extraction A random sample of 10 of the data extraction completed in the original review1 was checked by LT and found to be consistent with information reported in the primary studies.
Blinding
not detected.
Power Analysis
not detected.
Replication

Pertinent qualitative data including direct participant quotes, researcher interpretations and concepts were extracted in duplicate (by MS and FP) with discrepancies discussed and resolved.
Number: Pertinent qualitative data including direct participant quotes, researcher interpretations and concepts were extracted in duplicate (by MS and FP) with discrepancies discussed and resolved.
Data Information
Availability: The search strategy is available in the online supplemental file S2. 10.1136bmjopen-2021-052832.supp2 Supplementary data Study selection Studies from the earlier review1 were included in the review update.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Literature searches The following databases were searched , from January 1996 to November 2016 in the earlier review1 and from January 2016 to December 2019 for this update: MEDLINE , PubMed , Embase , Health Management Information Consortium (	MEDLINE		Suggestion: MEDLINE (RRID:SCR_002185)(link)
	PubMed		Suggestion: PubMed (RRID:SCR_004846)(link)
	Embase		Suggestion: EMBASE (RRID:SCR_001650)(link)
, Cumulative Index of Nursing and Allied Health Literature (CINAHL) , Global Health , PsycINFO , the Cochrane Library , NHS Evidence , Google Scholar , Google , ClinicalTrials . gov and the ISRCTN registry , Web of Science , Science Citation Index and OpenGrey	PsycINFO		Suggestion: PsycINFO (RRID:SCR_014799)(link)
	Cochrane Library		Suggestion: Cochrane Library (RRID:SCR_013000)(link)
	Google Scholar		Suggestion: Google Scholar (RRID:SCR_008878)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
