SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: The inclusion criteria were giving consent to participate in the study; and medical student with experience in e-learning during or before the COVID-19 pandemic.
IRB: 2) Former experience of E-learning Yes 15 (12.3) No 107 (87.7) 2.7 Confirmation of ethics and consent to participate in the study The study was started after the approval of the present study in the research committee of Ahvaz Jundishapur University of Medical Sciences and after receiving the code of ethics committee on research with human (IR. AJUMS. REC.1399.542).
Inclusion and Exclusion Criteria
The inclusion criteria were giving consent to participate in the study; and medical student with experience in e-learning during or before the COVID-19 pandemic.
Attrition
not detected.
Sex as a biological variable
Table 1 Gender Frequency (%) Male 52 (42.6) Female 70 (57.3) Age: Median years 18–23
Subject Demographics
Age: 2.3 Selection criteria Medical students aged 18 years or older participated in the study.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
