SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
15 For this study, we included individuals invited to participate in the DNHS, aged 32–56 years by 1 January 2010 (40–64 years in 2018) and who did not have multimorbidity in 2010, that is, had only one or no chronic condition at baseline (n=102 818).
Sex as a biological variable
All models were adjusted for sex (male; female), age categories (40–44; 45–49; 50–54; 55–59; 60–63 years of age) and ethnicity (Danish born; other than Danish born).
Subject Demographics
Age: 15 For this study, we included individuals invited to participate in the DNHS, aged 32–56 years by 1 January 2010 (40–64 years in 2018) and who did not have multimorbidity in 2010, that is, had only one or no chronic condition at baseline (n=102 818).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Data Information

Identifiers: 10.1136/bmjopen-2021-053274.supp1 Supplementary data Statistical analysis LCA was chosen over count of chronic conditions (ie, two or more chronic conditions) to explore the associations of educational level with multimorbidity by different chronic condition patterns.	10.1136/bmjopen-2021-053274.supp1

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
18 19 Anatomical Therapeutic Chemical (ATC) and indication codes for redeemed prescription drugs sold in Danish pharmacies were obtained from the Danish National Prescription Registry.20 We used latent class analysis (LCA) to group classes of chronic conditions that describe the multimorbidity pattern of this study population.	ATC		
Analyses were performed in SAS V.9.4 (SAS Institute).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
