SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The institutional review boards of Johns Hopkins and JHCP approved this study as minimal risk and waived the requirement for informed consent.
Consent: The institutional review boards of Johns Hopkins and JHCP approved this study as minimal risk and waived the requirement for informed consent.
Inclusion and Exclusion Criteria
Patients were excluded if they were older than 13 years old at the time of the first recorded encounter or if they had a follow up time of less than 3 years.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: The study cohort included patients of JHCP pediatric and family practices, ages 8-20 years old who had at least 3 well visits between January 1, 2013 and January 1, 2019.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
We assessed the relationship between sex and anti-infectives, as well as infection category, using chi-squared statistics as well as adjusted Cox regression modeling.	chi-squared

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
