Document Identifier: **PMC8882668**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Data were collected using a self-administered questionnaire after obtaining written consent from doctors and nurses.
IRB: This study was approved by the ethics board of Hangzhou Normal University (No. 2019065).
Inclusion and Exclusion Criteria
Participants were required to meet the following inclusion criteria: 1) worked in a local hospitalcommunity health center for at least one year and 2) willing to participate in the study.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis Data were analyzed using SPSS 23.0 (SPSS Inc., Chicago, IL, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The rank sum test was used to compare the health promotion capacity scores of doctors and nurses.	The rank sum test
Multicollinearity was assessed by Pearson correlation coefficient and by checking the variance inflation factor in a multiple regression model with the same dependent and independent variables.	Pearson correlation
35 The -2 log-likelihood ratio test was used to test the overall significance of the model.	log-likelihood ratio test
The fit of the model was assessed using the Hosmer-Lemeshow goodness-of-fit chi-square test.	chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
