SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The Climb study was approved by the medical ethics committee of the Leiden University Medical Centre
Consent: Written informed consent was obtained from all participants.
Inclusion and Exclusion Criteria
2.2 Procedures 2.2.1 Inclusion criteria for this comparative study For this comparative study , we included women aged 70 years or older with primary operable invasive breast cancer (TNM stages:
Attrition
not detected.
Sex as a biological variable
In short, this prospective, multicentre, observational cohort study comprised women aged 70 years and older with primary operable invasive breast cancer, recruited from 56 sites in England and Wales between 2013 and 2018.
Subject Demographics
Age: In short, this prospective, multicentre, observational cohort study comprised women aged 70 years and older with primary operable invasive breast cancer, recruited from 56 sites in England and Wales between 2013 and 2018.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
2.3 Statistical analysis All analyses were performed in SPSS version 25 .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Pearson chi-squared test was used to evaluate differences in the tumour , geriatric and treatment characteristics between the cohorts .	chi-squared test
Kaplan-Meier analyses and log-rank tests were conducted to evaluate overall survival in both cohorts in total and for the two treatment categories (PET and surgery) .	log-rank tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
