SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was performed according to the Declaration of Helsinki and was approved by the local Ethics Committee of the Board of Physicians of the Region Nordrhein and of the Heinrich Heine University Dusseldorf, Germany (reference number: 5951R).
Consent: All patients gave written informed consent to participate in the study.
Inclusion and Exclusion Criteria
6 The inclusion and exclusion criteria are summarised in table 1.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Software and Algorithms			
Data analysis Data analysis and visualisation was performed with GraphPad Prism (V.9.0.0).	GraphPad Prism		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Correlation analysis was performed with the Spearman correlation coefficient.	Spearman correlation
DAgostino & Pearson test was used to test for normality.	Pearson test
Differences between two groups were determined using the Mann-Whitney U test.	Mann-Whitney U test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
