Document Identifier: **PMC8891773**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Both the reviewers assessed individual articles based on the inclusion and exclusion criteria.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
Only randomized controlled trials (RCTs) were eligible to be included in the review.
Blinding
Each study was assessed for bias in random sequence generation, allocation concealment, blinding of participants and personnel, blinding of outcome assessment, incomplete outcome data, selective reporting, and other bias.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
MATERIALS AND METHODS Search strategy The authors planned and executed this study conforming to the recommendations of the PRISMA statement (Preferred Reporting Items for Systematic Reviews and Meta-analyses)[17] and the Cochrane Handbook for Systematic Reviews of Intervention[18].	Cochrane Handbook		
We conducted an electronic literature search across PubMed, Embase, Scopus, and Google Scholar databases.	PubMed		Suggestion: PubMed (RRID:SCR_004846)(link)
	Embase		Suggestion: EMBASE (RRID:SCR_001650)(link)
	Google Scholar		Suggestion: Google Scholar (RRID:SCR_008878)(link)
Two reviewers assessed the quality of each RCT using the Cochrane Collaboration risk assessment tool[18].	Cochrane Collaboration risk assessment tool[18		
Statistical analysis The software “Open MetaAnalyst” was used for the meta-analysis[19].	MetaAnalyst”		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Heterogeneity was assessed using the I 2 statistic.	I 2 statistic

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
