SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Fig. 1 Timeline of sample collection from poultry and swine workers, and the general population, 2015–16. Fig. 1 The protocol of blood sampling and face-to-face interview were approved by the ethics committee of School of Public Health, Sun Yat-Sen University (No. 2014–018).
Consent: Written informed consent was obtained prior to blood sample collection and interviews.
Inclusion and Exclusion Criteria
The inclusion criteria were: 1) had been working or living in settings with swine exposure (swine farm, live pig market, pig slaughterhouse or pork market) for more than 10 weeks, and exposed to pigs for more than 5 h a week; 2) age ≥ 16 years.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data analyses were performed using SPSS software version 20.0 (IBM, Chicago, USA) and R version 4.0.4 (R Development Core Team).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
	R Development Core		Suggestion: R Project for Statistical Computing, RRID:SCR_001905(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
HEV serological results were first studied as dichotomous outcomes using two-sided Chi-square tests or the Fisher's exact test.	Chi-square tests
	Fisher's exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
