SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was reviewed and approved by the Medical Ethical Committee of Affiliated Hospital of Guangdong Medical University
Consent: Written informed consent was obtained from each enrolled patient .
Inclusion and Exclusion Criteria
Exclusion criteria: patients who have withdrawn from hydrogen-oxygen therapy patients accompanied with liver, kidney, and heart diseases.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: The patients recruited in this study meet any of the following criteria: patients were diagnosed as COVID-19 patients were aged between 18 and 80 years patients were treated with nebulized hydrogen-oxygen mixture.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
28 2.6 Statistical analysis SPSS 20.0 was used for statistical analysis.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The difference of continuous variables before and after treatment was compared by Mann-Whitney U test, and the difference of classified variables was compared by chi square test and Fisher exact test.	Mann-Whitney U test
	chi square test
	Fisher exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
