SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: 2 Participants and methods 2.1 Participants This study was approved by the Ethics Committee of The General Hospital of Western Theater Command and written informed consent was obtained from all participants.
Consent: 2 Participants and methods 2.1 Participants This study was approved by the Ethics Committee of The General Hospital of Western Theater Command and written informed consent was obtained from all participants.
Inclusion and Exclusion Criteria
Patients were excluded as the followings: 1. traumatic brain injury; 2. secondary hemorrhage, such as venous malformation, brain aneurysm, brain tumor associated hemorrhage, sinus embolism, and hemorrhagic cerebral infarction; 3. no surgical intervention prior re-examination; 4. primary ventricular hemorrhage; 5.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
[13] Using artificial sketch ROI , python was used to calculate hemorrhage volume and volume changes .	python		Suggestion: python-bx (RRID:SCR_024202)(link)
All statistical analyses were performed using SPSS software (Version 23.0	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Mann–Whitney U test , independent t-test , square test , and Fisher exact test were used for one-way variance analysis .	Mann–Whitney U test
	t-test
	Fisher exact test
Correlation analysis was analyzed with Pearson and Spearman correlation tests .	Pearson
	Spearman correlation

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
