SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Inclusion criteria for all groups were subjects with (1) best-corrected visual acuity (BCVA) of 2030 or better (2) clear ocular media to prevent poor-quality imaging of the macula and FAZ.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The foveal microvascular dimensions were calculated using a custom-developed MATLAB program23 and this algorithm has been used to study the FAZ dimensions in normal, diabetic and myopic eyes.	MATLAB		Suggestion: MATLAB, RRID:SCR_001622(link)
Statistical Analysis All statistical analyses were performed using the SPSS version 20 (SPSS Inc, Chicago, Illinois, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The normal distribution of quantitative variables was checked using the Kolmogorov-Smirnov test.	Kolmogorov-Smirnov test
A one-way analysis of variance (ANOVA) and Kruskal Wallis analysis was performed for comparison between PVD groups.	analysis of variance
	ANOVA
	Kruskal Wallis
A two-sided unpaired students t-test was used to compare the various parameters of the sub-group myopic groups.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
