SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical approval was obtained from the Dublin City University Research Ethics Committee (DCUREC2014227 DCUREC2017128) .
Consent: Participants provided written consent prior to participating in the study .
Inclusion and Exclusion Criteria
Selection criteria (eligibility) Adults >=18 years of age with an established diagnosis of cancer who had completed treatment , had been referred to MMO , and given medical approval to participate in an exercise programme by a healthcare professional were recruited to participate in the study .
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Selection criteria (eligibility) Adults >=18 years of age with an established diagnosis of cancer who had completed treatment , had been referred to MMO , and given medical approval to participate in an exercise programme by a healthcare professional were recruited to participate in the study .
Randomization
not detected.
Blinding
not detected.
Power Analysis
2.4 Statistical power and sample size G*Power software 28 was used to perform the sample size calculation .
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
2.4 Statistical power and sample size G*Power software 28 was used to perform the sample size calculation .	G*Power		Suggestion: G*Power, RRID:SCR_013726(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
