SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Methods This cross-sectional study was approved by the Institutional Review Board (IRB) of Yeungnam University Medical Center (IRB number, 2020-09-079) and conducted in accord with the Declaration of Helsinki.
Consent: The requirement for written consent was waived by the IRB because of the retrospective nature of the study.
Inclusion and Exclusion Criteria
Exclusion criteria included the presence of glaucoma or retinal disorders affecting retinal capillary changes other than DR .
Attrition
Thus , in total , (4 + 381 x 2) x 3 = 2298 features were extracted for each patient .
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
All data were randomly divided at the patient level , and which data to use for training or testing was also randomly determined , but no data were used for both training and testing .
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
For normal eyes, patients who had visited the hospital for visual floater and ocular discomfort and who had undergone detailed examination, including OCTA	OCTA		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
