SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The KNHANES is a legally grounded survey mandated by Article 16 of the National Health Promotion Act and approved by the KDCA's Institutional Review Board (IRB No. 2018-01-03-P-A, 2018-01-03-C-A).
Consent: Participants provided written informed consent before completing the KNHANES survey.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: , 1,081 adults aged 19 years or older who had been diagnosed with CVD (i.e. , stroke , myocardial infarction , or angina) by a physician , did not have cancer , and had no missing values in terms of QoL , general factors , health-related factors , and disease-related factors were included in the analysis , as shown in Figure 1 .
Weight: Obesity was reclassified to reflect whether the participants were obese (body mass index [BMI] , ≥25 kg/m2) or non-obese.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis The collected data were analyzed using IBM SPSS for Windows ver .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The differences in QoL based on the participants' general characteristics, health-related factors, and disease-related factors were analyzed using the t-test and one-way analysis of variance for complex samples.	t-test
	analysis of variance

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
