SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: All respondents signed the consent form for voluntary participation in the research.
Inclusion and Exclusion Criteria
Women who had previous psychiatric diagnosis were also excluded from the study.
Attrition
not detected.
Sex as a biological variable
Subjects and Methods Participants The study included 124 postpartum women divided into two groups of women having delivered with and without epidural analgesia.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Package for the Social Sciences, version 20.0 (SPSS Inc., Chicago, IL, USA) was used on data analyses.	Statistical Package for the Social Sciences		Suggestion: SPSS, RRID:SCR_002865(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The χ2-test was used to test differences in categorical variables.	χ2-test
Distribution of measured variables fit normal distribution, so parametric statistics was used (t-test to test difference between two groups, ANOVA for testing difference among three groups according to anxiety category, and Pearson correlation coefficient to calculate correlations among examined variables).	t-test
	ANOVA
	Pearson correlation

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
