SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IACUC: NCSU) Animal Care and Use Committee approved all care , handling , and sampling procedures utilized in this study .
Euthanasia Agents: Following blood collection , broilers were euthanized via cervical dislocation .
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
There were 6 replicate cages of female broilers and 6 replicate cages of male broilers per treatment .
Subject Demographics
Age: A total of 216-day-old broilers (Ross 708 Strain; NC State University Hatchery , Raleigh , NC) were selected from a pool of 223 for use in this study .
Randomization
The healthiest and most uniform birds were stratified within sex by weight and randomly assigned to 1 of 3 treatments .
Blinding
not detected.
Power Analysis
not detected.
Replication
There were 6 replicate cages of female broilers and 6 replicate cages of male broilers per treatment .

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical Analysis Data were analyzed statistically as a completely randomized design by analysis of variance using the Proc Mixed procedure of SAS (2002).	analysis of variance
Differences among treatment means were determined using the LSD test when the overall treatment or sex × treatment interaction was significant ($P < 0.05$).	LSD test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
